MICHAEL THOREAU

Brisbane, Australia

michael@thoreau.com.au   michaelthoreau.github.io

EDUCATION

The University of Queensland   *Graduated Dec 2017*
Bachelor of Computer Engineering and Electrical Engineering
Bachelor of Computer Science

The Technical University of Munich   *Winter Semester 2016*
Exchange Semester

PRACTICAL SKILLS AND TOOLS

Software Engineering	Python, C, C++, MATLAB, Ada
ML and CV	Tensorflow, PyTorch, OpenCV
Design and Simulation	Solidworks, Diptrace, Simulink
Specialised Operating Systems	ROS, FreeRTOS

EXPERIENCE

CSIRO   July 2017 - Present
Engineer, Research

· Self-Supervised learning research (*PyTorch, Python, High-Performance Clusters*).
· Development of high accuracy pedestrian counting systems (*Machine Learning, Tensorflow, Object Tracking, Pedestrian Re-ID*).
· Generating obstacle maps from 3D LiDAR (*ROS, Point Cloud Processing*).
· Development of a distributed 3D vision system, real-time processing with 60 cameras (*C++, Computer Vision, Docker*).

The University of Queensland   March 2016 - July 2016
Tutor

· CSSE3010 'Embedded Systems Design and Interfacing' (*C, FreeRTOS*).
· Demonstrating, teaching, adding content to course materials.

CSIRO   July 2015 - August 2016
Honours Thesis Student and Intern

· Development of high-performance microphone array hardware for robotics (*PCB Design, Mixed Signal Instrumentation*).
· Development of FPGA based beamforming for Angle of Arrival Estimation (*VHDL, Linux Drivers*).

SwarmFarm - Robotic Agriculture Startup   June 2014
Mechatronics Placement

· Short placement, tracking control for a rear-wheel steering robot.

PUBLICATIONS

Deep Similarity Metric Learning for Real-Time Pedestrian Tracking   ACRA 2019

HIGHLIGHTED COURSES

Course (institution)	Grade (1-7 equivalent)
Honours Thesis (UQ, CSIRO)	7
Satellite Communication Lab (TuM)	1+ (7)
Control Engineering 1 (UQ)	6
Real-Time Programming Languages (TuM)	1.7 (6)
Computational Physics (UQ)	6
Advanced Embedded Systems (UQ)	6

OTHER

European Student Earth Orbiter Project - TuM ground station

- Design, implementation, and testing of ground station vertical axis control software.

- Satellite successfully launched aboard a SpaceX Falcon 9 rocket, Dec 2018.

5kV high-energy plasma thruster experiment power supply

- Project with a friend at the International Space University (Strasbourg, France).

- Electronics Design.

Australian Cyber-Security Challenge

- A competitive, 24hr, offensive computer security challenge with aspects of reverse engineering, web security and penetration testing.

- Ranked 16th out of 64 teams in Australia (1st in state).

Other Interests

- Photography, Hiking, Cycling, Student Pilot (RPL, class 1 medical).
